

Introducing
Helm Nicosulfuron 75
 from **HELM AGRO US, INC.**
75 WDG Nicosulfuron

Helm Nicosulfuron 75 is a WDG formulation with 75% of the active ingredient nicosulfuron. Helm Nicosulfuron 75 is labeled for postemergent use in Corn, Sweet Corn and Sorghum. As a postemergent spray, Helm Nicosulfuron 75 controls many troublesome grass species such as barnyardgrass, foxtails, johnsongrass, ryegrass, and wild oats. The same application controls selected broadleaf weeds like morningglory, pigweed, smartweed, and burcucumber. Helm Nicosulfuron 75 is easily tank-mixed with other popular corn herbicides containing atrazine, Dicamba, or Callisto® to broaden activity. Some rotational crops such as soybean can be replanted at intervals as short as 15 days. Always read and follow label directions.

Key Product Benefits:

- **Easy to use fast dissolving WDG formulation**
- **Can be used safely in field corn and sweet corn**
- **Controls a wide range of tuff grass weeds**
- **Controls some broadleaf weeds**
- **Easily tank mixed with popular corn herbicides**
- **Low use rates provide economical control**
- **Convenient packaging with measuring device in case**

Product Information:

- **10 ounce jugs, 10 x 10 ounce cases, 40 cases per pallet**
- **Minimum order = 1 case**
