

CROP PROTECTION SOLUTIONS

A POWERFUL PORTFOLIO OF PROTECTION

Eliminate weed, insect and disease threats with crop protection from HELM. Offering top quality solutions with proven modes of action and diversified use applications, HELM delivers the protection you expect with the economic value you demand.

HERBICIDES

ARGOS

An excellent contact and residual herbicide to control broadleaf weeds in corn, stone fruit, tree nuts and others. Labeled for pre- and post-emergence applications, Argos is a powerful tool against weeds resistant to triazines, glyphosate, PPO and ALS-inhibiting herbicides.

ACTIVE	GROUP
Mesotrione	27

FEARLESS

An atrazine-free acetochlor formulation with a top quality safener. Consistent, season-long performer against 60 weeds. Requires less moisture to activate. Rotational flexibility with wide application use as a pre-plant, pre-emergence and early post-emergence up to 11-inch corn. Contains 7 lbs acetochlor per gallon.

ACTIVE	GROUP
Acetochlor	15

FEARLESS XTRA

An atrazine plus acetochlor premix for pre-emergence control of 50 grass and broadleaf weeds on corn. Excellent results regardless of tillage system with tank mix compatibility. Rotational flexibility and wide application window. Contains 4.3 lbs acetochlor and 1.7 lbs of atrazine per gallon.

ACTIVE	GROUP
Acetochlor + Atrazine	15 & 5

FEARLESS XTRA 5.6L

An atrazine plus acetochlor premix for pre-emergence control of 50 grass and broadleaf weeds on corn. Excellent results regardless of tillage system with tank mix compatibility. Rotational flexibility and wide application window. Contains 3.1 lbs acetochlor and 2.5 lbs of atrazine per gallon.

ACTIVE	GROUP
Acetochlor + Atrazine	15 & 5

HELMET

A top quality metolachlor herbicide with Benoxacor safener in an EC formulation. Provides pre-emergence control of annual grasses and broadleaf weeds in all types of corn and other crops. Labeled for Fall or Spring applications. Contains 7.8 lbs of metolachlor plus safener per gallon.

ACTIVE	GROUP
Metolachlor plus safener	15

HELMET SPC

A best-in-class metolachlor herbicide without safener. Delivers pre-emergence control of annual grass and broadleaf weeds in soybeans, pod crops and potatoes. Labeled for Fall or Spring applications. Convenient EC formulation with 8 lbs of active ingredient per gallon.

ACTIVE	GROUP
Metolachlor	15

HELMQUAT 3SL

A broad-spectrum, non-selective herbicide with 3 lbs of active ingredient per gallon. Labeled for use as a burndown and/or pre-plant on over 100 crops. Excellent resistance management tool and can also be used as a harvest aid in soybeans and cotton.

ACTIVE	GROUP
Paraquat	22

Continue to back

QUIZ

A superior solution for controlling volunteer corn and other annual and perennial grasses in soybeans, canola, cotton, sugar beets and sunflowers. Flexible rates with wide application window. Delivers equivalent performance to Assure® II. Performs equal to or better than most clethodim-based products.

ACTIVE	GROUP
Quizalofop	1

RO-NEET

An early-season herbicide for control of annual grass and small-seeded broadleaf weeds in sugar beets, garden beets and spinach. With long-lasting residual, Ro-Neet delays subsequent weed flushes up to 8 weeks. Features an easy-to-use 6 lbs liquid formulation.

ACTIVE	GROUP
Cycloate	8

VERDURE-X

A fast and reliable tool for pre-harvest desiccation of potatoes, canola and other crops. Enables greater control over harvest management and timing while maximizing crop quality and profitability. Superior liquid formulation that is rainfast within 30 minutes.

ACTIVE	GROUP
Diquat	22

ZONE 4F

A maximum strength soil-applied herbicide that is highly effective in controlling more than 100 sedge, broadleaf and grass weeds. Can be Fall applied in a burndown program or in the Spring as a no-till or minimum-till practice. Residual activity and flexible usage allows it to be used on a wide variety of crops.

ACTIVE	GROUP
Sulfentrazone	14

ZONE

Powered by two advanced modes of action, Zone provides pre-emergent control of small- and large-seeded broadleaf weeds, including glyphosate and ALS-resistant biotypes. Long-lasting residual for optimal timing of post soybean applications. Flexibility plus superior crop safety in a convenient, easy-to-use formulation.

ACTIVE	GROUP
Sulfentrazone + Chlorimuron	14 & 2

ZONE ASSIST

A dual-action, early-season herbicide that controls 65 broadleaf and grass weeds. Effective against glyphosate-resistant species. Offers flexible application timing. As a single, simple solution, Zone Assist provides soybean growers with an early-season foundation tool for cleaner fields.

ACTIVE	GROUP
Sulfentrazone + Imazethapyr	14 & 2

ZONE ELITE

A superior pre-emergence-herbicide for control of resistant broadleaf and grass weeds like waterhemp and amaranthus species. Two modes of action plus 45 to 60 days of long-lasting residual control. Provides greater flexibility for follow-up post glyphosate applications on soybeans.

ACTIVE	GROUP
Sulfentrazone + Metolachlor	14 & 15

FUNGICIDES

HELMSTAR PLUS SC

A premier fungicide for disease control across multiple crops including corn, soybeans, peanuts and wheat. A top quality formulation with the industry's most complementary systemic AI's. Provides preventive and curative activity plus a residual barrier to inhibit newly forming diseases from occurring.

ACTIVE	GROUP
Azoxystrobin + Tebuconazole	11 & 3

INSECTICIDES

KENDO

KENDO 22.8 CS

A powerful weapon for controlling primary and secondary pests across a broad-spectrum of crops. Fast-acting with top performance and residual activity. Kendo contains 1 lb of active ingredient per gallon in an EC formulation. Kendo 22.8 CS contains 2.08 lbs of active ingredient per gallon in a CS formulation.

ACTIVE	GROUP
Lambda-cyhalothrin	3A
